MarginCOS

COMMERCIAL OPERATING SYSTEM

Stop guessing.
Start recovering margin.

How MarginCOS finds and recovers the margin your P&L is silently losing - in under five minutes, from a single data upload.

3 - 6%

ONE UPLOAD

Comprehensive analysis

<5 Min

TIME TO INSIGHT

From data to decisions

THE PROBLEM

Every CFO in Nigeria Is Fighting the Same Battle.

40 - 60%

Input cost inflation since 2022

<30%

Of companies have product-level margin visibility

₦15 - 30M

Average Big Four diagnostic report cost

The result: pricing decisions made on instinct, not data. Margin absorbed instead of recovered.

MarginCOS was built to close this gap.

THE QUESTIONS NOBODY CAN ANSWER FAST ENOUGH

Six commercial questions. One platform. Under five minutes.

1. Which products are absorbing inflation that should have been passed through?
2. Which promotions are destroying margin while the sales team celebrates volume?
3. Which channels are quietly financing partners at your expense?
4. What does your P&L look like under the next cost shock, before it hits?
5. Which products should be repriced, protected, or delisted - right now?
6. Where is your willingness-to-pay headroom before volume breaks?

WHAT MARGINCOS DOES

One Upload. Eight Engines. One Board-Ready Report.

01

UPLOAD

Your pricing, cost, and channel data - as a single file. No ERP. No IT project.

02

ANALYSE

Eight intelligent engines run simultaneously across your portfolio. Results in seconds.

03

ACT

A branded PDF diagnostic report, ready for your board. Plus an interactive dashboard to explore the data.

No ERP integration required · No consultant required · No waiting for month-end · Most clients live within 48 hours

Engines 1 - 3: Pricing, Cost Recovery, Channel Economics

① Pricing Intelligence

- Product-level elasticity modelling
- Quantifies WTP headroom before volume breaks
- Impact of proposed price changes - before you move
- Flags products priced below elasticity-adjusted optimum

② Cost Pass-Through

- Measures inflation recovered vs absorbed into margin
- RAG classification: Managed · Watch · At Risk
- Benchmarks vs Carthena Advisory's 70-75% recovery standard
- Names the products bleeding the portfolio

③ Channel Economics

- True cost of each route-to-market
- Hidden financing cost of trade credit (days × rate)
- Channels destroying margin through credit terms alone
- Price realisation gap vs portfolio average

Engines 4 - 8: Trade, Portfolio, Scenarios + Enterprise Modules

④ Trade Execution

- Every promotion: margin-accretive or destructive?
- Breakeven volume lift required per discount depth
- Net ₦ P&L impact of every trade promotion
- Identifies which promotions to cut, restructure, or keep

⑤ Portfolio Rationalisation (M1)

- 2×2 matrix: margin contribution vs strategic volume
- Protect · Grow · Reprice · Review - per product
- Names specific reprice and delist candidates
- Quantifies margin at stake from dilutive products

★ M1 Enterprise Module

⑥ Forward Scenario Engine (M2)

- Projects P&L under 20% - 75% cost inflation
- Five recovery rate scenarios simultaneously
- Worst-case monthly hit if zero action taken
- Board-ready table to anchor pricing commitments

★ M2 Enterprise Module

⑦ M3 · Commercial Spend ROI Analyser · ⑧ M4 · Partner Performance Scorecard

THE OUTPUT

A Board-Ready Diagnostic Report. In Under Five Minutes.

The MarginCOS PDF export delivers a branded, structured diagnostic across all modules - ready to table at your next board or ExCo meeting.

- One module per page - structured and scannable
- RAG status, callout narrative, product-level tables
- Benchmarked against Carthena Advisory's industry analysis
- Priority action items with naira values attached
- Exportable with one click from the dashboard

What others charge

₦15 - 30M

Big Four diagnostic report

MarginCOS delivers the equivalent

in under 5 minutes

from your own data, at a fraction of the cost

WHO IT'S BUILT FOR

Built for organisations where margin is a board-level conversation.

LIVE TODAY

FMCG & Manufacturing

Multi-product portfolios facing dual pressure from input cost inflation and price-sensitive consumers.

Distribution & Retail

Businesses with multi-channel complexity where margin leaks through credit, discount, and channel mix.

ONBOARDING NOW

Logistics & Distribution

Lane profitability, fuel cost recovery, and customer margin.

IT Services

Service line pricing, cost-to-deliver, and contract margin.

Telecoms

Product rate intelligence and cost pass-through recovery.

Aviation

Route yield, fuel cost, and load profitability.

MD / CEO · Portfolio-level visibility | CFO · Scenario planning & benchmarks | Commercial Director · Pricing, promotion ROI, channel economics

HOW IT WORKS

Four steps. Most clients are live within 48 hours.

01

Download Template

Receive the MarginCOS data template. Pre-mapped columns for pricing, cost structure, and channel data.

›

02

Upload Your Data

Upload your completed file. The platform validates every column and flags errors before analysis runs.

›

03

Review Findings

Eight interactive modules render instantly. Drill into any pillar - see product-level detail, RAG status, and narrative callouts.

›

04

Export & Present

One-click PDF export. Branded pages. Board-ready in under five minutes from upload.
